The GPMS TRANSPORTAL is an ICT initiative for Citizen Engagement in Governance at all levels with Information for All

1. It leverages state of art technologies like cloud computing, big data, mobile apps, analytical engines etc. with management concepts like crowd sourcing, professional project management, program monitoring, evaluation and control etc.
2. It is a real-time decision support system.
3. By using the GPMS Transportal, achieving all the Seventeen Sustainable Development Goals well before 2030 will become a reality.
4. It is an omnibus ICT tool for Citizen Engagement in myriad contexts.
5. It applies to all levels of Governance from Global to Local and even Corporate Governance
6. It puts Citizen F.I.R.S.T and foremost and has Information for all on selected issues of Governance
7. It gives the Governance a single point of contact for ascertaining citizen preferences for the policy formulation as well as it gives Citizen, a single window of delivery of citizen services as per citizen charter
8. It is a common Communication portal for responsible sharing of information between all stakeholders
9. It facilitates stakeholder management and helps in TEAM building
10. It facilitates revenue department to monitor Property Taxes, all R-codes, all P-codes, all Projects, complaints with advanced analytics
11. It facilitates and provides a Toll-Free Solution, Video Conferencing
12. It facilitates organizations to get in touch with masses instantly
13. It facilitates and provides real time citizens / customers feedback
14. It facilitates automated outbound survey and Inbound promo survey solution
15. It facilitates citizens with open, easy access to information You could see the Demo Video to know about all the GPMS-Transportal Features and the Demo user logins below is available for viewing the

This is totally an indigenous cloud computing platform product conforming to the 'Make in India' Policy of the Govt. of India and perhaps it may not be an exaggeration to say that the myriad features available in this TRANSPORTAL are not available, off the shelf, in many standard software packages being marketed by MNC's across the Globe. This TRANSPORTAL can make a headway in reducing the digital divide because it has the capability of establishing link between G to C and C to G because many citizen centric services can be effectively delivered and monitored on a time bound basis by the government. The citizens' participation in governance can be enabled in many ways including mobile services. Thus the main objective of DIGITAL INDIA mission can be effectively implemented by the govt. by deploying this TRANSPORTAL.

This Make in India's Innovative GPMS TRANSPORTAL integrated with multiple banks payment gateways and intelligent router has the fullest capability to provide e-tool

for monitoring and evaluation of flagship programs of the Govt. of India such as EPASHUHAAT,SMART CITIES, AMRUT CITIES, SWATCH BHARAT, MAKE IN INDIA, SKILL INDIA, DIGITAL INDIA, SATH, Online medical records, AYUSHMAN BHARAT, Open Source Pharma affordable medicines for all, programs or initiatives etc. GPMS-Transportal public cloud is hosted from CSIR 4PIIndia's own highly secured supercomputing infrastructure facility of government of India.This internet access to technology will not only empower the masses but also make people accessible to the government which will become the 2-way communication between citizens and government.

The Indian CST's GPMS-Transportal has the following USP's

1. Citizens Cloud computing solutions along with E-Vault which will become a one-stop information backbone portal for communities, entrepreneurs, sponsors and general public.
2. Generic GPMS-FMS as per NMAM will act as an evaluation e-tool for any organization use, customers can utilize individual products, a combination of products and services or the entire suite. Govt. of India Ministries, Departments, NGO's, MSME, Industry, Social Entrepreneurs, Women Entrepreneurs, Students, GoI Schemes/Programs, International Companies, Corporates, Tax Compliance, Experts, Crowd Sourcing, Banks, etc.
3. 20 Mobile Applications integrated into India Citizens Network and Projects (The Photos, Videos, Audios are automatically geo-stamped & transmitted immediately to Document Management System (DMS) folder–no tampering of GPS/photo/Audio/Video information possible)
4. A Generic Document Management System integrated as per NDSAP with crawler to mine data for banks, insurance companies, financial services which will become their single window e-KYC verification platform
5. GPMS online analytics e-tool enabled with a customized dashboard for auto generation of MIS reports
6. Generic User Management - The User can invite friends, import contacts, post text/video discussions, rate, review and recommend interested products, participate in a survey, take a poll and earn points
7. Document level security integrated
8. Useful for all Central Govt. of India or State or Local Govt. organizations project related databases

integrated into a single database with various analytics reports enabled
9. India Citizen Network will not only empower the masses but also make people accessible to the government and technology.
10. The Data center in box, Smart TV and Smart PC integrated with the GPMS TRANSPORTAL devise as a paid service can also be made available
11. Over the last 10 years, Indian Centre for Social Transformation (Indian CST) has built a GPMS TRANSPORTAL Cloud Enabled, Public Finance Management with Citizen Participation for ushering in Digital Transformation and Good Governance from Global to Local levels.
12. Integrated with UMANG Mobile Apps, Latest Technologies, Blockchain Artificial Intelligence Big Data, Analytics Cloud Computing
13. Masters: The user can create their own Master data for their Organization, Organization Users, Departments, Designations and Categories.
14. Stakeholder Organizations: Create Organizations, registers employees
15. Generate Project Code and approval: The user can generate Project Code by providing the needed information of the Project. Once the user generates the Project Code, Approval has to be obtained by his/her higher authority. Once his/her Project gets approved, the user has to enter additional information of the Project. Project Dashboard will be generated.
16. Customized Role based user Dashboards
17. Uploading Documents against the Project/Programs or Schemes
18. File sharing / forward feature for verification and approval
19. Milestones and Task management for M&E
20. Online Bill Payment to contractors against the milestones
21. Cost and Time Analysis Reports
22. History of Modified and Deleted Projects
23. Online Quarterly Progress Reports (QPR)
24. Watch List enabled on Dashboard
25. Initial Scrutiny Report - for missing data update
26. Online Recording Minutes of Meetings
27. Customized and Abstract Reports generation
28. Cost Overrun and Time Overrun Project Dashboards
29. Used across a range of stakeholders including Ministries, Departments and District Municipalities
30. Transparency and accountability through field data capture
31. Improves the efficacy of the delivery of projects and eliminate corruption
32. For any issues, the user can raise the complaint in Online Helpdesk and also can view the status / response from his higher authorities
